

GreenLeaf Solar — Company Overview

& 2025 Report

GreenLeaf Solar is a renewable energy company founded in **2014** in Galway, Ireland, by engineer **Maria O'Connell**. The company designs and installs residential and commercial solar panel systems across Europe. As of 2025, GreenLeaf employs **480 people** and operates in **seven countries**: Ireland, the United Kingdom, France, Spain, Germany, the Netherlands, and Portugal.

Mission

GreenLeaf's mission is to make clean solar energy affordable for every household in Europe by 2035. The company reinvests **15% of annual profit** into research on battery storage technology.

2025 Financial Highlights

Metric	2024	2025
Revenue	€42 million	€61 million
Net profit	€5.1 million	€8.4 million
Installations completed	9,200	13,750
Customer satisfaction	91%	94%

Revenue grew by approximately **45%** year over year, driven largely by strong demand in Germany and Spain, which together accounted for 38% of all new installations in 2025.

Flagship Product

The company's best-selling product is the **GreenLeaf SunMax 400**, a high-efficiency solar panel with a rated output of **400 watts** and a **25-year warranty**. The SunMax 400 converts up to **22.5%** of sunlight into electricity, which is above the industry average of 20%.

Sustainability Goals

- Become fully carbon-neutral in all operations by **2030**.
- Recycle 95% of decommissioned panels through a take-back programme.
- Plant one tree for every installation completed (over 13,000 trees in 2025).

Leadership

Maria O'Connell serves as Chief Executive Officer. The Chief Technology Officer is **David Kumar**, who joined in 2018 and leads the battery storage research division. The company's headquarters remain in Galway, with regional offices in Berlin and Madrid.

Challenges

The main challenges identified in the 2025 report are supply-chain delays for semiconductor components and a shortage of certified installation technicians. To address the skills gap, GreenLeaf launched a training academy in 2025 that has so far certified **320 new technicians**.
